APPENDIX: Quotation of Mantras

INTRODUCTION

This is the first part of a new critical edition of the Vādhūla Śrautasūtra. Treated in this article are the sections of the Agnyādheya and the Punarādheya which make the major part of the first book of the entire Śrautasūtra. As an introduction to the critical edition of the text, I shall give the following short articles: I. Short survey of the study of the Vādhūla Śrautasūtra, II. Detailed account of the utilized MSS., III. Notes on the critical apparatus and notes on the style of present edition.

I. Survey of the Study of the Vādhūla Śrautasūtra

It was in 1920 that Willem Caland got the first information on the texts of the Vādhūla school, then little known Vedic ritual school belonging to the Yajurveda. He immediately ordered copies of the manuscripts from Madras and started to study them. Subsequently he published the result of his study in a series of articles in *Acta Orientalia* between 1923 and 1928 and laid the

basis for the further studies.¹ Although his study covered various aspects of the texts of the Brāhmaṇa (Anvākhyāna/Anubrāhmaṇa) and Śrautasūtra of this school with morphological, syntactical and lexicographical characteristics, he did not publish the complete text neither of the Brāhmaṇa nor the Śrautasūtra. He published many excerpts with translations and it seems that greater importance was given to the Brāhmaṇa than the Śrautasūtra. With regard to the Vādhūla Śrautasūtra, Caland published only some eighty fragments, though he had prepared a transcript from the Devanāgarī copy which had been sent to him from Madras. While the framework of the sūtra was thus reported, the actual contents of the entire sūtra have been kept unknown to the scholarly world.

After almost fifty years' lacuna, Michael Witzel revived the interest to the texts of this still less known, nevertheless important school of the Black Yajurveda. During his search for important Vedic manuscripts in a broader perspective, he found several new manuscripts of this school including Caland's handwritten copy of the sūtra. In his important contribution to the study of the Vādhūla tradition, he gave a survey of the available manuscripts and discussed the contents of the various texts belonging to this school in its historical perspective. Following Witzel's research, Max Sparreboom found more materials in South India, especially in Kerala, where the families of the Vādhūla tradition are still living. Asko Parpola, in connection with his study of the Jaiminīya tradition in South India, made a survey of the present distribution of the Vādhūla houses(Mana) in Kerala and gave a supplementary list of the existing manuscripts of this school preserved in the libraries and universities with the help of the editorial staff of the New Catalogus Catalogorum.²

It is under these conditions that efforts have been made to edit the texts of this Vādhūla school, which had been available only fragmentarily. As a first result an edition was published as the joint work of M. Sparreboom and J.C.

¹ The manuscripts available to Caland were the following ones: a copy of the Vādhūla Śrautasūtra with fragment of Gṛhyavyākhyā (!), a copy of the Vādhūla Brāhmaṇa (Anvākhyāna/Anubrāhmaṇa) and two commentaries to the Śrautasūtra. For this school in general, see Caland 1923,1924,1926,1928; Renou 1947; Kashikar 1966; Tsuji 1970; Witzel 1975; Sparreboom and Heesterman 1989 (Introduction); Chaubey 1993 (Introduction).

The Vādhūla school belongs to the sub-recension(*śākhā*) of the Taittirīya school and it is as old as the Baudhāyana, the oldest sūtra among the Yajurveda sūtras.

² See Parpola 1984, pp. 9f.

Hecsterman in 1989.³ This contains the sections of the Agnyādheya and the Punarādheya, which are the main subjects of the first book of the Vādhūla Śrautasūtra. Then, B.B. Chaubey, who had earlier announced the edition of the Śrautasūtra, finally published his text in 1993. His edition covers the fifteen sections, contained in the longest MS. among the then available MSS.

The authors of both editions could make use of the MSS. all of which belong to the same single recension. They are, as will be seen in the following, the MSS. written in Devanāgarī or Roman script, which were copied, directly or indirectly, from a Malayālam MS. This original MS., which had been considered as lost, was named *K* by Prof. Witzel and this appellation has been followed by other scholars.⁴ Therefore, the MSS. utilized by the previous editions are the secondary manuscripts which are nothing but copies of a common single Malayālam original. Further, these *K* recension MSS. share the common, almost fatal, defect of being full of lacunae which are traced back to their original MS., *K*. These lacunae are found almost on every page and many of them extend more than twenty syllables. Sometimes a lacuna extends over several lines. The corrupt readings and the lacunae in the *K* group of manuscripts do not easily allow researchers to reconstruct the original readings. Further, the defective state of the text could lead even the expert researcher to misunderstand the true intention of original text.⁵

Such being the case, I had no choice but to search for new MSS. which would be older and less defective than the then available ones. During my research tours in 1992 and 1994, I could fortunately search out various kinds of MSS. belonging to the Vādhūla ritual tradition. They include the MSS. of the Śrautasūtra, the Gṛhyasūtra, their commentaries, Prayogas and a Saṃgraha. I have been planning to publish the editions of these texts one by one in due course of time in cooperation with young scholars. Among them, the editions

³ See Sparreboom and Heesterman 1989 in the bibliography.

⁴ See Witzel 1975, pp.75-77; Sparreboom and Heesterman 1989, p.12; Chaubey 1993, pp.12-13. During my research tour in Kerala during September 1994, I found a very old, almost collapsing, palm leaf MS. among the private MSS. collection of a Vādhūla family. Although there was no title on it, cursory reading made me believe that it was a new MS. of the Śrautasūtra. Later, through close examination, I could identify the MS. to be the same with the codex *K* which had been deemed as lost. See description of *K*₁ below.

⁵ On shaky argument depending solely upon the defective *K* recension MSS., see my article, Towards a 'Critical' Edition of the Vādhūla Śrautasūtra, *Studien zur Indology und Iranistik*, 20, Dr. Paul Thieme Felicitation Volume (1995) (In print).

of the Śrautasūtra and the Gṛhyasūtra will be taken precedence.⁶

II. Account of the Manuscripts

In the following, detailed account of the MSS. utilized for this new edition will be given. In addition to the MSS. utilized in two previous editions mentioned above, I have obtained six new MSS. with regard to the Śrautasūtra: five in Malayālam script (K_1, K_2, K_3, N_1, N_2)⁷ and one in Devanāgarī (T_1, T_2).⁸

The MSS. utilized in this edition may be arranged into two groups. The first one is represented by a Malayālam MS. K_1 and its direct and indirect copies in Devanāgarī or Roman script (M, H, C).⁹ As has been noticed above,

⁶ On this occasion, I would like to express my deep gratitude to those people who generously allowed me to utilize their manuscripts or their copies for my study, and to those who helped me in obtaining the new MSS. Among all of them, my hearty thanks first go to Prof. Michael Witzel who kindly let me utilize his copies of the Devanāgarī MSS. of K recension. It was through his copies of MSS. that I could start taking an active interest in the texts of the Vādhūla school. I also express my gratitude to Prof. Asko Parpola and Dr. M. Sparreboom for their useful advices regarding the collection of MSS.

Almost all the new MSS. were found with the private collections of the leading *Manas* of the Vādhūla tradition. I would like to express special thanks to the people of Vādhūla families in Iriñjālakuṭa, especially late śrī N.T.P. Raman Namboodiripad and śrī N.R. Pradeep Namboodiripad (Neṭumpiḷli Mana), śrī K.T.P. Namboodiripad and śrī K.V. Padmanabhan Namboodiripad (Kitāññaśśeri Mana) for their generosity and constant cooperation during my study of their invaluable manuscripts. My thanks also extend to śrī K.P.C. Anujan Bhattatiripad (Cherpu) and śrī L.S. Rajagopalan (Trichur) who helped me much during my fieldworks in Kerala.

I also deeply appreciate technical advices and files for macros for Sanskrit with T_EX offered by Prof. Jun Takashima and Mr. Makoto Fushimi. Finally I would like to acknowledge the financial support extended to me from the Mitsubishi Foundation, Japan for my research tours in South India during the years of 1992 and 1994.

⁷ These Malayālam MSS. belong to the private collections of two houses which have traditionally been regarded as the leading families among those belonging to the Vādhūla school. These houses were set up in late 17th century when a head house Talaṇanallūr Illam was partitioned into four houses. The name Talaṇanallūr occasionally appears among the list of respected brāhmins in the temple inscriptions of Trivandrum after 12th century.

⁸ Both T_1 and T_2 are written in the same MS; T_2 is given as variant or complementary reading of T_1 which is the main text of the manuscript. As will be seen below, each of them was taken from a different Malayālam MS.

⁹ There are more Devanāgarī MSS. belonging to this recension. For instance,

all the MSS. utilized in previous editions and studies belong to this group. They are to be traced back to their single original Malayālam MS. As the Malayālam (K_1) MS. found by me in 1994 at Kitāññaśseri Mana in Iriññālakkuṭa has been identified as the lost original(= K), this group of MSS. is hereafter called as K_1 recension MSS.

Except K_1 , all the newly found MSS. belong to the second group. The two groups of MSS. can be differentiated by the extent of their contents. The first group covers fairly large extent of the Śrautasūtra, while the second one extends only upto the end of the seventh prapāṭhaka, that is, the Agniṣṭoma section including the rite of Pravargya.¹⁰ The second group of MSS., therefore, do not record the rituals belonging to the categories of variation of Soma rituals in the classical scheme of ritual classification. The rituals given in the eighth prapāṭhaka onwards with the K_1 recension are not found in the second group of MSS. except the Pravargya.

1. K_1

This is an old palmleaf MS. which belongs to Kitāññaśseri Mana in Iriññālakkuṭa. It is $5 \times 65_{cm}$ of size and the total number of leaves are 130. There must be some missing leaves.¹¹ Text is written with old Malayālam script. On the front wooden-board is written the number 95 with white paint in Roman numeral. No title-page exists and no date is given. The MS. has been ill preserved and the leaves are badly damaged both by worms and humidity; most of them show large lacunae since they are broken off on the

MS.No.17720 of VVRI, Hoshiarpur; MS. at Vaidika Saṃśodhana Maṇḍala, Poona (see Chowbey 1993, pp.9-12); MS.No. TR 635.1- 3/A.63493 of Adyar Library, Madras. These MSS. have been neglected in this edition, since all of them are but secondary copies of M and are irrelevant for the purpose of preparing the critical edition. The Śrautasūtra portion of M has been well preserved and, as far as I can see, there is no loss or break in the MS. which would require the help of secondary copies of the same MS.

¹⁰ It is interesting to note that the Pravargya section is put towards the end of whole Śrautasūtra with the MSS. of K_1 (= K) recension, while it is combined with the Agniṣṭoma and is placed immediately after the latter in the other recension of MSS. Cf. Witzel 1975, pp.78-79; Chowbey 1993, pp.33-35. The fluctuating position of the Pravargya section has also been observed in other Yajurveda schools. Cf. Caland 1903, pp.8-9.

¹¹ The original number of this MS. must be 123. The extant K_1 , however, lacks leaves of 1-3, 9-11 and 46-47. They seem to have already been missing when it was copied into M during 1922-23 in Madras. Cf. note 16.

left sides to a great extent.¹² Contents of this K_1 MS. almost correspond to those of M : 1. fragments of the Vādhūla Gṛhyasūtra, 2. the extensive parts of the Vādhūla Śrautasūtra, 3. the Mantra-pāṭha and 4. the Anvākhyāna or the Vādhūla Brāhmaṇa.¹³

This MS., however, includes some fifteen leaves which had not been copied either by M or H . Most of them are attached to the end of the MS. The condition of material and handwriting of these folios are not different with other parts of this MS. cursory examination led me to the following observations on these stray leaves. Three folios have been identified as Gṛhyasūtra fragments.¹⁴ Another ten folios look to be fragments of a commentary or a Prayoga to the Gṛhyasūtra. Further, there are two stray folios misplaced in the middle of the Darśapūrṇamāsa description. They testify the existence of a unique ritual in the Vādhūla school. They give the description of the Gopitryajña or the Upavasathagavi (an ancestor ritual of the *Śrāddha* type which uses the offering of meat) which has so far been known only from the Baudhāyana Śrautasūtra (II.8-11).

2. M

The MS. belongs to the Government Oriental Manuscripts Library, Madras (GOML) and is numbered R.4375. While the actual MS. has 655 pages bound in two large-size notebooks, the description given by the Library Catalogue (= Triennial Catalogue) p.6425 says that it consists of 412 folios and being bound in two volumes.¹⁵ According to the colophons, this MS. was copied between 1922–23 from a manuscript of the “Kandangasseri Mana, Ir-

¹² Examination of readings and lacunae of this MS. has revealed that this is the “lost” original of the Devanāgarī and Roman MSS. (M, H, C) which were utilized by previous editions and studies. It seems that the damage of leaves has been somewhat enlarged since it was last copied in 1926–27.

¹³ For the detailed description of the contents of 2, see Witzel 1975, pp.78f., Chaubey 1993, pp.28f.; for 4, Witzel, *ibid.* pp.82–3; the short mantra collection of 3 consists of the mantras of both Śrauta and Gṛhya rituals which were not used in the sūtras. Cf. Caland 1926, pp.2f.; Kashikar 1966, p.67; Witzel 1975, pp.84; Chowbey 1993, pp.35f.

¹⁴ From their contents, I take them to be placed immediately after the Gṛhya fragments which come on top of the present MS. (1 of above contents.). The floating leaves nicely fit to the place by their description of ritual. The MSS. of the Gṛhyasūtra collected by me support the idea. These three leaves must be the original ninth, tenth and eleventh leaves which have not been found in the main text. (See notes 11 and 16.)

¹⁵ I agree with the view of Prof. Witzel that the description of the catalogue might hold true of the MS. copy (M_c) which was sent to Caland in early 1920’s. See Witzel 1975, p.98 note 12. The date of copying given in the Catalogue is 1923–24, while the dates given in the colophons of M by the copyist and the inspector indicate that this MS.

injalakuda, Cochin" (sic.). This original manuscript which had been believed to be lost was found by me at Kitānnaśseri Mana in Irīññālakkūṭa, Trichur District during the field research in September 1994. It is K_1 described above.¹⁶

The general contents are 1. fragments of the Vādhūla Gṛhyasūtra¹⁷, 2. the extensive parts of the Vādhūla Śrautasūtra (pp.28-438), 3. the Mantrapāṭha (pp.438-454) and 4. the Anvākhyāna or the Vādhūla Brāhmaṇa (pp.454-655). Cf. note 13 above. The innumerable lacunae of its original MS. are indicated by a series of dots, whose number is not always correct as to the missing syllables in the original, as can be seen now from a comparison with the text of K_1 , the original of M .

3. M_c

This is the Devanāgarī manuscript which was made for Prof. W. Caland and sent to Utrecht from Madras. It seems to have been sent in two packets during 1923-26.¹⁸ This MS. probably is the one described in the Triennial Catalogue of GOML p.6425 as M , of which total page number and the actual dates given in the colophons are different from those described in the Catalogue.¹⁹ Caland himself made a copy in Roman script (C) from this Devanāgarī copy. Although the first half of this handwritten copy (C) has been preserved at the University of Utrecht, the original Devanāgarī MS. itself has not been found and seems to have been lost.²⁰ Through careful examination of C , I have come to the conclusion that M_c was copied from M and not directly from $K(=K_1)$.²¹

was copied during 1922-23. Probably M_c was a copy made from M . See also the descriptions of M_c and C .

¹⁶ The lost original was named K by Prof. Witzel and the same appellation has been used by scholars. As several other new MSS. were found at Kitānnaśseri Mana, this MS. is called K_1 in this article. MS. M records the leaf number of its original Malayālam MS. on the left column of the corresponding page with the symbol number of Malayālam script. Each leaf of K_1 exactly corresponds to this numbering. According to these Malayālam numbers, following leaves were missing when M was made: 1-3, 9-11 and 46-47. The leaves of the corresponding numbers are missing in K_1 .

¹⁷ The MS itself (followed by the Catalogue) has the heading of *Vādhūlāparakalpavyākhyā* (pp.1-28)

¹⁸ Cf. Caland 1924, p.142; Caland 1926, pp.1-2.

¹⁹ See note 13.

²⁰ Cf. Witzel 1975, p.76.

²¹ Contrary to the opinion first taken by Witzel and followed by other scholars. Cf. Witzel 1975, pp.76-77; Sparreboom and Heesterman 1989, p.10; Chaubey 1993, pp.12-13.

4. *C*

Caland's handwritten copy based upon M_c in Roman script written on A4 size paper. It consists of 105 pages²² and covers the Vādhūla Śrautasūtra I.1 – VII.3 (middle).²³ It has been preserved at the central library of the University of Utrecht. *C* is not just a mere copy of M_c , that is, it is not just a transcription of the Devanāgarī MS. After having faithfully transcribed M_c , Caland revised his text from several viewpoints. He has corrected the clerical errors of M_c ; he tried to supply the mantra portion where the mantra was abbreviated or was cut off by lacuna in the original;²⁴ he filled in lacunae several times in the light of his learning of Vedic literature; he sometimes wrote his conjecture of reading on the margin of his manuscript. As the MSS. belonging to the K_1 recension show innumerable number of lacunae which often prevent the precise understanding of the textual and ritual process, Caland tried to fill in lacuna and to supplement what was missing in the MS. He tried to reconstruct the passage whenever he thought he could. Sometimes he is right and sometimes not. Anyway we must be careful with regard to the fact that Caland's manuscript is not just a faithful copy of the original MS., but one revised to some extent.²⁵

The reading of *C* before revision shares many clerical errors with that of *M*. Both of them also share the occasional careless omissions of lines.²⁶ These points would be enough to support the idea that *M* and M_c (as the original of *C*) are not mutually independent copies of K_1 , but either *M* or M_c is the original of the other. As the date of *M*'s copying is earlier than

²² Although the last page is numbered as 106 and the page 105 seems to be apparently lacking, it is simply Caland's mistake in numbering the last two pages and there is no missing page in this MS.

²³ On top of the first page is written the title: *Vādhūla Śrautasūtra*. This handwritten MS. *C* must be a complete copy from the first packet of the Devanāgarī MS. (M_c) sent in two packets to Caland, since the extent of the first packet described in Caland 1924, p.142 exactly corresponds to that of *C*.

²⁴ Caland supplied the mantra from the closest parallel in TS or TB and identified the text-place. Considering, however, the possibility of mantra-deviation of the Vādhūla school from the śruti texts of the Taittirīya śākhā, we must be careful of an easy identification of the Vādhūla mantras with those of the Taittirīya śruti texts.

²⁵ The edition of Sparreboom and Heesterman takes *C* as the basis for their text.

²⁶ Comparison of the reading of K_1 with that of *M* (and *C*) has revealed that *M*'s copyist committed many errors of skipping a line or two in his copying the original. See critical apparatus to the text edition (; for instance, n.109 to 1.1.3.E, n.93 to 1.1.4.8 et alii.)

that of M_c , the former must be the original of the latter.²⁷ I have utilized a zerox copy of this MS. offered by Prof. Witzel.

5. *H*

This paper Devanāgarī MS. is No.5657 of Vishveshvaranand Vishva Bandh Institute of Sanskrit and Indological Studies, Hoshiarpur. The title on the MS. is *Vādhūlagṛhyakalpavyākhyā*. It was directly copied from $K(=K_1)$ between 1926 and 27 in Madras. It consists of only 40 pages and is incomplete. Although being short, it transcribed its original MS. $K(=K_1)$ more faithfully than M . The content is: pp.1-28 (1.6): fragment of *Vādhūla Gṛhyasūtra* (corresponding to the first portion of K_1 and M .); pp.28 (1.7)-40: *Vādhūla Śrautasūtra* I.1.1.1 - I.3.2.28.²⁸

6. K_2

The palm leaf Malayālam MS. consists of 148 old leaves. The title "Vādhūlakagṛhyasūtram" (in Malayālam script) and the number 101 (in Roman numeral) are written on top of the cover-board. The size is $4.5 \times 44_{cm}$. This MS. has been badly preserved. The edge portions of leaves are occasionally broken and cause lacunae. Rather hasty and careless handwriting sometimes makes it difficult for the reader to decipher the text. The above title is only partly correct. The first sixty leaves (upto 60a) give the extensive fragments of the *Gṛhyasūtra* of this school and the fragments of the *Gṛhya Prayoga* written in Malayālam language.²⁹ In the following leaves(60b - 148), we have the *Śrautasūtra* description. It starts from the very beginning and ends with the section of Agniṣṭoma ritual (with the *Pravargya*). K_2 and K_3

²⁷ Cf. the descriptions of M and M_c , especially note13 above.

²⁸ Prof. Witzel kindly allowed me to use his film of the Hoshiarpur MS. for this edition. See Witzel 1975, pp.76-77 cum n.16; Sparreboom and Heesterman 1989, pp.11-12; Chaubey 1993, pp.8-9.

²⁹ The text of the *Vādhūla Gṛhyasūtra* has not been known to the scholarly world. Prof.Witzel rightly suggested that the fragments of the *Gṛhya* materials contained in the first part of MSS. M and H (*Vādhūla Gṛhyakalpa Vyākhyā*!) might belong to the *Pitṛmedha-* and *Gṛhyasūtra* of this school. He tried to find out the distinctive features of the text by comparing these fragments with the corresponding portions of the *Āgniveśya Gṛhyasūtra*. (Cf. Witzel 1975, pp.84ff.) The defective condition of these MSS., however, prevented Prof.Witzel from getting into further investigation. During my survey tour of the *Vādhūla* MSS. in 1994, I could also obtain several extensive fragments of *Gṛhyasūtra* MSS. with several *Prayoga* and *Samgraha* materials. On cursory examination of these MSS., I believe I have enough materials to reconstruct at least the *Pitṛmedhasūtra* and the sections more than half of the entire *Vādhūla Gṛhyasūtra*. I am planning to publish critical editions of these texts in the near future.

share many common readings and common extents of abbreviation, which suggest that these MSS. belong to the same recension. K_2 and K_3 have less mantra abbreviation than other MSS. I have taken these two MSS. as the basis of my present edition.

7. K_3

This is an old palm leaf MS. consisting of 149 leaves. It measures $5 \times 51_{cm}$. No title is given and only the number 51 is written with white paint on the front wooden cover in Roman numerals. It has been badly preserved and there are occasional breaks on both end of leaves, of which the break of right end causes lacunae in the text. First two leaves are missing.³⁰ Except the last two leaves, the MS. covers I.1.2.17 – End of VII(including the Pravargya section) of the Śrautasūtra. The last two leaves seem to be a fragment of a Grhya Prayoga.³¹

As has been said of K_2 , this MS. is closely connected with K_2 and belongs to the same recension. This is the codex that I have taken together with K_2 as the basis of present edition. Examination of its readings has revealed that this MS. is the original of N_2 described below.

8. N_1

This palm leaf MS. belongs to the Neḍumpiḷli Mana and is registered as No.122 by its provisional catalogue. It consists of 109 leaves and measures $4.5 \times 41_{cm}$. Each leaf has 8–10 lines per page. Text is written in old Malayālam character; the first leaf is missing and almost all leaves are partly broken on left-edge so that leaf-number is not legible in many cases. Under the front-cover of wooden board, there is added a title-leaf written with Devanāgarī script: “Śrauta Somayāgaprayoga, kai-109-4000-Old.” And some information on the condition of MS. is written in English: “Reverse(?) sides of the leaves are destroyed by white ants. It seems some (two or three) leaves are missing in the middle. Wants beginning and end. [final three or four words are illegible.]” This title-leaf was added when this MS. was borrowed and copied by the Oriental Research Institute and Manuscripts Library(ORIML) of Kerala University at Trivandrum. This is the MS., from which T_2 (see below) was transcribed and given as variants of T_1 (see below).³²

³⁰ The numbering of manuscript is given with the Malayālam style number. The first leaf under the wooden cover has the number “2(=nna)”. In the system of numbering of old Malayālam MS., two leaves (“śrī” and “1(=na)”) are missing.

³¹ These two leaves must have recently been added, since the material looks more recent than that of other leaves and the style of handwriting is totally different, too.

³² The style of description suggests that it was originally written in the library. The

The title given in the title-leaf, however, is wrong. The content is not the Somaprayoga, but an extensive portion of the Śrautasūtra. It starts from the middle of I.1.3.7 and ends up with VII (the Agniṣṭoma ritual with the Pravargya).³³

9. N_2

This palm leaf MS. also belongs to the Neḍumpilli Mana and is registered as No.121b by its provisional catalogue. It measures $4.5 \times 54.5_{cm}$ and consists of 113 leaves. Each leaf has 8-10 lines per page. The MS. has been well preserved and the text is written with clear and legible hand. The type of Malayālam character is different from that of the other Malayālam MSS. and seems to represent more modern style of writing. On the title-leaf below the wooden cover-board, the title is written both with Malayālam and Devanāgarī as “Vādhūlapraiṣārt(t)ham”. This title can be applied only for the first part of the entire MS. It consists of two parts: the first eleven leaves are fragments of Prayoga of Soma ritual and all of the rest give the description of the Śrautasūtra. The exact content of the latter is: Vādhūla Śrautaūtra I.1.2.17 – End of VII (the Agniṣṭoma ritual with the Pravargya). Comparison with the other MSS. has proved that this MS. is a direct copy of K_3 described above. It is, on the other hand, the original of T_1 , the Devanāgarī MS. preserved at the ORIML in Trivandrum. The composite MS. No.121 including this MS. was borrowed by the ORIML of Kerala University at Trivandrum, and was transcribed into a Devanāgarī MS. The date of its return to the owner is 2/3/16(=March 2, 1941).³⁴

10. T_1 and T_2

T_1 is a Devanāgaī paper MS. preserved at the ORIML of University of Kerala in Trivandrum and is numbered as $T1081B$. It is written on large size notebook of 317 pages. On the title page are written the MS. number, title and the names of copyist and inspector. The title given as “Somayāgaprayoga” represents only the first part of this MS., which is actually a composite manuscript. The Prayoga of the Agniṣṭoma ritual occupies the first thirty-three pages. Halfway down the same page, it abruptly breaks into

information given in this title-leaf is exactly the same with one given in the official record of the library. According to its record, this MS. had been kept for a year with the library under the name of $L258$ and was returned to the owner, Talāṇa(na)lūr Nanbūri Pāḍur (sic) on 9/3/17(= March 9, 1942).

³³ On the problem of the fluctuating position of the Pravargya section in the corpus of the Śrautasūtras, see note 10.

³⁴ Cf. note 32 above.

the description of the Śrautasūtra.³⁵ The Śrautasūtra portion lacks the opening part and covers I.1.2.17 – End of VII (including the Pravargya section). This is a Devanāgarī copy of the Malayālam MS. N_2 . But it was later consulted and revised with the readings of another MS. The variants are given in the footnotes as readings of “*kha*” and the main text of T_1 is sometimes changed with the reading of this MS. The MS. is called $L258$, which is nothing but the Malayālam MS. N_1 borrowed by the Library around 1940. (Cf. section of N_1 above.)

The relationship of all the MSS. described above may be clarified by the following diagram:

³⁵ The discontinuity can be explained from the manuscript arrangement of N_2 , from which this MS. was directly copied. In N_2 , the Prayoga is interrupted at the end of a leaf and the Śrautasūtra starts from the beginning of the next leaf. Probably the scribe of T_1 continually copied these two leaves without being conscious of a gap of contents between the two leaves.

III. Notes on the Critical Apparatus and the Edition.

In the presentation of apparatus, I have tried to give full information on the variant readings of the MSS. utilized for this edition. While the space of footnotes has consequently swollen, my intention is to present the reader as much information on the new materials as possible.

K_2 and K_3 seem to generally present, among all the MSS., the older situation of *sandhi* system of the Vādhūla texts and I have basically followed in the present edition the *sandhi* system observed in these MSS. In the following, I give some typical *sandhi* rules found among the older Malayālam MSS. (K_1, K_2, K_3, N_1). In the present text, some of them are “standardized.”³⁶

Consonant Assimilation.

In external *sandhi*, the following assimilation of a final to a following initial sound is observed:

[palatal] (e.g. *valmīkavapāñ ca*); [dental] (e.g. *ūrdhvan tata uddhṛtya*); [labial] (e.g. *ūrdhvam brahmaudana-*); [sibilant] (e.g. *bhūr bhuvā suvar*).

In addition to these, “-ṁ or -m + semivowel *v*” becomes “-m + semivowel *v*” in two of our old Malayālam MSS., K_2 and K_3 .³⁷

Anunāsika.

$-ṁ + s/ś/ṣ + C \longrightarrow -ṃ̇ + s/ś/ṣ + C$
(e.g. *jyotīṃ̇ṣy*; *ṛtaṃ̇ strṇāmi*; *somānaṃ̇ svarāṇam* et alii.)

Anunāsika occurring in K_1 is transcribed with so-called “gum-kāra” in the Devanāgarī MSS. of M and H . In the apparatus, this is shown by (ṃ̇*³⁸).

Upadhmānīya.

Upadhmānīya (ḥ) is found in the older type of Malayālam MSS. (K_1, K_2, K_3, N_1). *Visarjanīya* is replaced by *Upadhmānīya* before the voiceless labial

³⁶ The following examples are taken from the first and the second *prapāṭhakas* covering the rites of Agnyādheya, Punarādheya, Agnihotra, Agnyupasthāna and Darśa-pūrṇamāsa.

³⁷ Instead of the Anusvāra sign of a small circle, a tiny form of “*ma*” is written at the word-end. The copyist’s intention was to differentiate it from the usually expected Anusvāra sign. I interpret this “tiny letter of *ma*” as representing “-*m*”, and not “-*ṁ*”.

³⁸ Cf. M. Witzel, Anunāsika in Medieval Veda Tradition, *IJJ* 25 (1983), p.180.

(*p*, *ph*). There is no case of Jihvāmūliya in our MSS.

Drop of sibilant or Visarjanīya before a sibilant immediately followed by a semivowel or a hard mute.

e.g. *dhāta śriyan* instead of *dhātaś śriyan*; *bhū svāhā* inst. *bhūs svāhā*; *na svastaya iti* inst. *nas svastaya iti*; *rāya śrayantām* inst. *rāyaś śrayantām*; *prasalai śriyam* inst. *prasalaiś śriyam*; *maha stavāno* inst. *mahas stavāno* et alii.

In my text, following instances are “standardized”:

***r* + Consonant other than *h*.**

-*r*+ C → -*r*+ CC e.g. *pūrvam* instead of *pūrvvam*; *suvargam* inst. *suvarggam*; *kuryāt* inst. *kuryyāt*; *vartate* inst. *varttate*; *caturtham* inst. *caturttam* et alii.

However, *barhir*; *caturhotāram*; *gārhapatye*.

Consonant gemination.

Contracted forms of consonant gemination: *dattvā* inst. *datvā*; *chinatty* inst. *chinty*; *inddhe* inst. *indhe* et alii.

In these cases, consonant gemination is resolved and former forms are adopted in the present text.

-cś- / -chś

In the Malayālam MSS., there is no occurrence of consonant ligature of -*cch*-. Instead the ligature -*cś*- is consistently found except in *N*₂.³⁹

In the Malayālam ligature of -*cśa*- the syllables *ca* and *śa* are vertically arranged as [$\begin{smallmatrix} \text{c} \\ \text{ś} \end{smallmatrix} \text{a}$]. The letter *cha* [$\text{c}^{\text{c}}\text{a}$] itself seems to have been made by a horizontal combination of *ca* and *śa*. In my text, -*cś*- is normalized into -*cch*-. Thus,

1. *kiñ cicśandas* → *kiñ cic chandas*; *tacśakeyam* → *tac chakeyam*; *āgnīcśakalam* → *āgnīc chakalam*;
2. *ucśiṣṭam* → *ucchiṣṭam*; *vicśinnam* → *vicchinnam*;
3. *gacśati* → *gacchati*; *upārcśati* → *upārccati*; *acśā* → *acchā*

³⁹ *N*₂, the newest MS. among the Malayālam MSS., writes -*cś*-. Sometimes *K*₁ writes -*chś*-, too.

There are cases where some MSS. write *-ch-* instead of *-cś-* with others: *mā chitsi* K_3 , *mā cśitsi* N_1 [2.3.4.10]; *loma chindīta* K_1, K_3, N_1, N_2 , *loma cśindīta* K_2 [2.1.2.24]; *anuchandasam* all MSS. [1.6.1.5]; *sarvāṇi chandāṃsi* K_2, K_3, N_2 , *sarvāṇi cśandāṃsi* N_1 [1.6.2.17]; *gāyatreṇa chandasā* K_1, K_3, N_1, N_2 , *gāyatreṇa cśandasā* K_2 [1.6.5.18]; *daśāñ chinaty* K_1, N_1 , *daśāñ cśinaty* K_2, K_3 [2.1.2.24] et alii.

Notes on the present edition.

As has been noted above in the description of the MSS., *M*, *H* and *C* are direct or indirect copies of $K(=K_1)$. Although being the same MS., K and K_1 are different in that the latter is more decayed and lacunae are generally more enlarged than the former.⁴⁰ The first reason why I have given in the critical apparatus the readings of secondary MS. belonging to K_1 recension is as follows: these MSS. may retain the readings of K which are missing in K_1 , since they might have got lost after the 1920's when K was copied by the MSS.

M is a direct copy of K made in 1922–23, but it introduced a sign which was not found in K_1 . It is a vertical straight stroke, sometimes very short, which seems to intend for separating sentences like *daṇḍa*.⁴¹ As the sign is not used in the original Malayālam MS., I have ignored it in the present edition, except the cases where it affects the *sandhi* rule of this MS.⁴² While *C* is based upon M_c which is a copy of *M*, it shows traces of efforts of Prof. Caland; filling in lacunae, supplying abbreviated parts of mantras, revising the original readings and “standardizing” the *sandhis*. Although it is not important for preparing the critical edition, I have included the readings of “Caland manuscript” to show how the erudite scholar of Vedic ritual handled the material.

Another reason for recording all the variants from the secondary MSS (*M*, *H*, *C*, T_1 , T_2) is that I want to show the reader how the readings of these MSS. are different from those of their respective original MSS. in Malayālam script and how the latter were interpreted and “standardized” in the formers.

⁴⁰ Therefore, K represents the state of MS. in the 1920's when it was copied into *M* and *H*, while K_1 shows the present state, having got more decayed since then.

⁴¹ In many cases, however, the signs are not properly placed and are misleading in understanding the text.

⁴² I have also ignored the same sign used in an another Devanāgarī MS., T_1 with T_2 , which is a hybrid copy of N_1 and N_2 .

Although the Malayālam MSS. do not use the *avagraha* sign, I have added it in my edition for the reader's convenience.⁴³

The Vādhūla MSS. show occasional lacunae that resulted from the damage of the palm leaves. The most damaged MS. is K_1 and many of its leaves are extensively torn off at their left ends. In such cases twenty to thirty syllables per line are in lacuna. In the apparatus, such lacuna is represented by dots. Thus, successive three dots indicate lacuna of three or more syllables; two dots a lacuna of two syllables; a single dot represents a syllable or a consonant(-ligature). With a view to the occasional existence of large lacuna, sign of four dots is introduced. It indicates that the lacuna extends upto the end of the concerned sūtra.

The mantra quotation in the text is italicized for easy identification of the mantra portion of the sūtra. The quoted mantras in the sūtras, although abbreviated in most cases, often show deviation from the *śruti* texts of the Taittirīya school, as has first been noticed by Prof. Caland. In Appendix, I have collected the texts of mantra quotation and compared the quoted form of the mantra with that of the corresponding Taittirīya śruti texts. As the mantra collection of the Vādhūla school has not been found so far, I am not able to say at this point whether or not the abbreviated portion of the mantra quotation in the sūtra also shows deviation from the Taittirīya śruti text. The reader, however, will see that plenty of deviations from Taittirīya śrutis are in the Vādhūla mantras quoted in the sūtras.

Abbreviation of part of mantra is indicated in the MSS. with the use of sign (=) or (+). The older Malayālam MSS. use the former sign.⁴⁴

In the present text, passages are divided into *sūtras* and the numbering is given accordingly by the editor. Basically a single unit of action and mantra is taken as a single sūtra. I have taken the appellations of higher levels of text division from the descriptions of commentaries.⁴⁵ The levels of

⁴³ The sign is found with all of the Devanāgarī MSS., although it is often dropped even when it is required.

⁴⁴ The sign of abbreviation is used not only for a longer mantra in a sūtra, but only for a series of action units covering a good number of sūtras. This is done for the economy of description. In the latter case, however, the number of sūtras included in abbreviation can be quite large and sometimes amounts to an entire *paṭala*.

⁴⁵ Two commentaries are: the Vādhūlakalpasūtravyākhyā (Vyākhyā) by Āryadāsa and the Prayogakalpanā (Kalpanā) of Raghurōṇa. The former is also called the Kalpāgamasamgraha and the latter has other names of the Prayogakṛpti or the Prayogasaṃdarbha. I have obtained several copies of MSS. of these texts.

text division are *prapāṭhaka*(chapter), *anuvāka*(section), *paṭala*(subsection) and *sūtra*. The MSS. themselves present only the division of *paṭala* level.⁴⁶ The commentaries give the number of *anuvāka* at each section-end, and that of *prapāṭhaka* at each chapter-end, the largest kind of text-division. They provide no clue to the identification of the smaller subdivision than *anuvāka*, although the term *paṭala* is occasionally used. While the name of *paṭala* does not appear in the Śrautasūtra MSS., they differentiate the level of subsection by the device of word-repetition.⁴⁷

As there is no break in the text except at the end of a *paṭala*, I basically followed the *sandhi* of Malayālam MSS. *Sandhi* is dissolved by a hyphen when a sūtra division is introduced and the italicized mantra portion is differentiated with the other portion of the sūtra.

Malayālam MSS. have peculiar sign(s) at each *paṭala*-end signifying the end of *paṭala*. I indicate the sign(s) as “end-mark(s)” in the present edition. The mark generally looks to be just a sign without any meaning, although that of N_2 looks like a script of *om* in Malayālam. Some MSS. have just a single sign, while others (K_2 and K_3) give the ordinal number of the *paṭala* by symbol number of Malayālam between the marks.

⁴⁶ Although Caland’s handwritten copy (*C*) gives the number of *prapāṭhaka*, *anuvāka* and *paṭala*, they were added by Caland himself with the help of commentary information. As Caland reports, the Devanāgarī copy sent from Madras (M_c) did not contain such information. A single exception of explicit reference to the division name in the MSS. is found at the end of the Aśvamedha section of K_1 and M : // *iti navamo (a)nuvākaḥ* // // *aśvamedhākhyah prapāṭhakah samāptah*//

⁴⁷ The opening words of a new subsection are given in advance at the end of immediately preceding subsection. The transition to a new subsection is thus identified through the repetition of words. When no word-repetition occurs at the bridge portion of two subsections, we may identify it as the transition to a new *anuvāka*, a higher level of division. Some of the Malayālam MSS. identify the end of *prapāṭhaka* by indicating the name of major ritual in the chapter. For instance, the colophon: *samāptam idam ādhānam* (K_3) is given at the end of the first *prapāṭhaka*.

¹¹⁷ K₂: bhūmi bhūmnaty; N₂,T₁: bhūmir bhūmety

¹¹⁸ K₃,N₂,T₁; abhimantra . . . mantrayate [about 12 syllable lacuna in K₃]; K₂ has the "end marks" here with the paṭala number "4(=skra)" and repeats afterwards *tam bhūmir bhūmnety abhimantrayate*. K₃ must have the same paṭala-transition under its lacuna portion. If we assume here the existence of paṭala-number "4" with K₃, its sequence of paṭala-number goes straight; as the former number is "3" and the next number is "5". The spaces of lacuna in N₁ and K₁ also support the idea that the paṭala-transition has been covered by lacuna with both of these mss.

* Utilized mss are K₁,K₂,K₃,N₁,N₂,M,H,C,T₁,T₂.

¹ *tam* — *abhimantrayate* is found only with K₂. Its existence in the other Malayalam mss, however, is inferred from the space of lacuna of these mss. Cf. n.118 of 1.1.4E.

⁷² K₂,K₃ and N₂ have the “end mark(s)” here. K₂ gives the number “12(=ma, nna)” between the marks. K₃ does not give the number here, which is an exceptional case with this ms. N₁ does not have word-repetition which would be expected at paṭala-end. T₁ has the double daṇḍa “// ” to show the section-end. K₁ shows lacuna here and neither the “end mark” nor the word-repetition is not seen on the ms. Judging from the space of lacuna (of about 16 syllables), however, the existence of both is inferred.

* Utilized mss are K₁,K₂,K₃,N₁,N₂,M,C,T₁,T₂.

¹ The passage containing paṭala-transition is in lacuna with the mss of K₁ recension. K₁'s space of lacuna seems to support the idea that the repetition phrase in the paṭala-transition would exist in this ms.

³² In C, the passages from 1.3.4.8 to 19 [*'parañ caturgr̥hītaṃ gr̥hñīte taj juhōti — ity āhavanīya eva*] are contracted into the following: *taj juhōti pūrṇā paścād ity āhavanīye caturgr̥hītaṃ gr̥hñīte yat te devā adadhur ity āhavanīya eva*. The reading in the text has been construed from two reasons: 1. this offering expects to be accompanied by a mantra like the previous offerings in the Āhavanīya and the Gārhapatya (cf. also another offering on the Anvāhāryapacana in 16); 2. as the previous two sets of offering are for the pair of Full- and New-moon nights, this offering is expected for Ekāṣṭakā. (For this triad of three nights, cf. ŚB6.2.2.30; 6.4.2.10; TB3.11.1.19 etc. “*ekāṣṭakā*” is a pratika of TS4.3.11h(=KS39.10) and the mantra is also used in VādhŚS8.42(Agnicayana) for placing a brick called *Ekāṣṭakā*, of which use is found only in the Vādhūla school.

⁴⁴ K₁,M: . . . ; [for C, see note 32 above]

APPENDIX: Quotation of Mantras in the VādhūlaŚS.

The mantras quoted in the Vādhūla sūtra sometimes show deviation from those recorded in the *śruti* texts of the Taittirīya *śākhā*, i.e. Taittirīya Saṃhitā, Taittirīya Brāhmaṇa and Taittirīya Āraṇyaka. Although the contents of the mantras generally are very close to those of the Taittirīya's, they show occasional variations from the latter. This is one of the peculiar features of the texts belonging to the Vādhūla school. Further, we also encounter several mantras which are not found in any of other Vedic texts known to us. We may assume that the original compiler of the Vādhūla sūtra was well versed in the *śruti* texts belonging to his own school which were different from those of the Taittirīya *śākhā*. The texts of the Vādhūla *śrutis* themselves, however, have so far been lost for us both in oral and written tradition and our information on the Vādhūla mantras is limited only to the quotations and references given by the sūtra text. Therefore, it will be important for the study of the Vādhūla texts to examine the mantra quotations in the sūtra text and see to what extent the mantras used by the Vādhūla school deviate from those of the Taittirīya's or other *śruti* texts. In the following, all the mantra occurrences of Agnyādheya section are listed up and are compared with the closest passages of other Vedic texts.¹

As for the style of quotation, the Vādhūla sūtra basically gives mantra *in extenso*.² The manuscripts of this sūtra, however, show peculiar manner of abbreviation in its presentation of the text. When the quoted mantra is long or several mantras are quoted in sequence, the later part of mantra(s) is abridged with the use of abbreviation mark “=” or “+”.³ In such a case, we are not able to know whether there might exist variant reading(s) in the

¹ As for the affiliation of the Vādhūla school within the Taittirīya *śākhā* and the problem of Vādhūla's mantra deviation from the Taittirīya *śruti* texts, see Caland 1923, pp.5f.(=Kl.S., pp.270f.); 1924, pp.143f.(=Kl.S., pp.278f.); Tsuji 1975, pp.31-32 cum notes; Witzel 1975, pp.92-94 and Chaubey 1993, pp.39-46, pp.56-61.

² *Pratīka* type of quotations are also sometimes met with. In principle, the Vādhūla sūtra quotes the mantra in its full form just as the Baudhāyana, the other older Taittirīya sūtra, does. Except for the cases where the mantra has already been quoted in full in the earlier portion of the text, the *pratīka* type of quotation is not expected to occur. We come across, however, some irregular cases of *pratīka* quotation in this sūtra. Close investigation into these cases will shed light on the problem of textual formation of the Śrautasūtra of this school. There must have been several stages before the sūtra has finally taken its present shape. I shall discuss this problem in a separate article.

³ See p.16.

abbreviated passage or not and I just give the parallel *śruti* text while putting the abridged portion into brackets. In the following, the closest occurrences of mantras are given for comparison, among which those of the Taittirīya school are especially taken into consideration. The words where the Vādhūla sūtra shows variants of the closest *śruti* text either of the Taittirīya or of other Vedic school are underlined>. For quick reference for the reader to the text comparison, the following signs are used:

[] : abridged portion of the mantra-quotation in the Vādhūla sūtra.⁴

= : the quoted mantra is found in this form in the Taittirīya (or some other) *śruti* text.

(=) : except the abridged portion, the reading of the quoted mantra is the same with that of the Taittirīya (or some other) *śruti* text.

(p) : *pratīka* manner of quotation, *i.e.* the mantra is indicated only by its first words.

1.1.1.8 See TS1.3.13g(=), without *svāhā*):

Anuvitti is a name of homa accompanied with TS1.3.13g. Cf. Caland 1924, p.157 and 1928, pp.190f. especially p.192. Cf. also VādhŚS1.4.1.37; 7.2(Agniṣṭoma); 8.1(Agnicayana). The mantra itself is arranged for use in TS at a butter-offering after the Prātaranuvāka of the Soma ritual, cf.TS6.4.3.2. Baudhāyana sūtra(2.13:55.4) has a similar *āhuti* called *Anukhyā*(; the accompanied mantra is TB1.2.1.23=TS4.1.2k. The mantra is again used later at the procession with a horse towards the Āhavanīya fire. The use of this mantra in the Agnyādheya seems to have been transferred from the Agnicayana ritual.)

1.1.2.1 This *Sāvitra* mantra, although its first half is found in many mantras as a common phrase, is not found elsewhere in this form:

devasya tvā savituh prasave 'śvinor bāhubhyām pūṣṇo hastābhyām adityai juṣṭam ādityebhyo juṣṭan nirvapāmi.

1.1.2.11-13 See TB1.2.1.9-10(=), (p). Among the three mantras quoted, the first one is given in full while the other two are in *pratīkas*.

(=) 1. *samídhāgnīm duvasyata, ghr̥táir bodhayatātīthim, ásmín havyá juhota-na.* (=TS4.2.3d)

⁴ Each recension of manuscript gives a different extent of abbreviation. The extent adopted in the main text generally agrees with that of mss K₂ and/or K₃, which usually give(s) the least extent of abbreviation among all the mss.

1.1.3.8-9 Parallel mantra(s) found elsewhere only in the Śrautasūtras of the New Taittirīya schools. The mantras separated here is found combined in ĀpŚS5.10.1: *ṛtañ str̥ṇāmi purīṣaṃ pṛthivyām, ṛte 'dhy agnim ādadhe satye 'dhy agnim ādadha ity āyataneṣu sambhārān anuvyūhati.* HirŚS3.3: 309-310: *ṛtañ str̥ṇāmi purīṣaṃ pṛthivyām ṛte 'dhy agnim ādadhe satye 'dhy agnim ādadhe divas tvā vīryeṇa pṛthivyai mahimnā, antarikṣasya poṣeṇa sarvapaśum ādadha iti saṃsr̥ṣṭān (scil. sambhārān) kalpayati. (divas tvā—ādadhe is the same with TB1.2.1.18-19.)* BhārŚS5.7.7 gives the mantra only by *pratīka(!): ṛtañ str̥ṇāmi purīṣam.*

V: *amīśān tvā devānām vratapate vratēnādadhē gāyatrena chandasā (traīṣṭubheṇa chandasā, jāgatenā chandasā).* The words *amīśān* and *devānām* are to be replaced by appropriate word respectively according to the sacrificer's *gotra* and *varṇa*. This type of prescription is not found in other sūtras.

Cf. TB1.1.4.8: (b) *bhṛgūṇām tvāṅgirasām vratapate vratēnādadhāmīti bhṛgv-aṅgirasām ādadhyāt*, (c) *ādityānām tvā devānām vratapate vratēnādadhāmīti anyāsām brāhmaṇīnām prajānām*. 1.1.3.20–21 Unidentified mantra. Cf. ĀpŚS6.20.2[with var.](*agniyupasthāna* of Agnihotra), TS4.2.7d(only latter part: *jahāmi—amīvām*).

1.1.4.1 Mantra variation. Cf.TB1.2.1.20: *ahám tvád asmi mād asi tvám etát, māmāsi yónis táva yónir asmi, mámaivá sán*(V: *yathāyatham*) *vāha havyāny agne*(V: *havyāni devān*), *putráḥ pitré lokakṛj jātavedaḥ*.

1.1.4.2 Three *Sarparājñi* mantras(TS1.5.3b-d)[(=),(p)].

Other Taittirīyakas prescribe four *Sarparājñis*(=TS1.5.3a-d). In this regard, Vādhūla is closer to the other Yajurvedins and it deviates from what is told by the Taittirīya *śruti*. The reading of mantra text, however, seems to be (almost) the same with that of Taittirīya Saṃhitā. Cf. KS7.13:75.8-9,76.6-7,19-20;MS1.6.1: 85.9-13.;VS3.5-8. cf. Caland on ĀpŚS5.12.1.

TS1.5.3b-d: (b) *āyám gáuh pśsnir akramīd ásanam mātáram púnah pitáram ca prayánt súvah*. (c) *triṃśá[d dhāma ví rājati vāk patanḡāya śísriye práty asya vaha dyúbhiḥ*. (d) *asyá prāṇád apānaty ántás carati rocaná vy ákhyan] mahisáh súvah*.

1.1.4.4 For *upasthāna* with *Sāmans*, cf.TB1.8.1.1-3. Rathantara *Sāman*: SS 2.1.1.11.1-2(or 2.30-31)=RS7.32.22-23:

abhí tvā sūra nonumó 'dugdhā iva dhenávaḥ, íśānam asyá jágataḥ svardśsam íśānam indra tasthúṣaḥ. ná tvāvāṃṃ anyó divyó ná pārhivo ná jātó ná janisyaṭe, aśvāyantó maghavann indra vājino gavyántas tvā havāmahe.

Interesting point of the Vādhūla's *sāman* quotation is that eight syllables of the fourth pāda of the first verse and the second pāda of the second verse are respectively repeated. In this regard, the quoted text is very close to that of Ūhagāṇa. While the Jaiminīya's text has not been printed, Kauthuma's text is as follows: *rathantaram*. (pra) *abhi tvā sūra nonumo vā, (u) ādugdhā iva dhenava íśānam asya jagataḥ, svvā2 3rdśām, (pra) āyisānam ā2 3yindrā3, (u) sūsthū2 3 4ṣā, o vā6, hā ū vā [1]. There have been divergent opinions among *sūtrakāras* as to who recites *sāmans* during the ritual of Agnyādheya:

[*brahman* or *udgātr*] JaimŚS1.23;LātŚS4.9-10;DrāhŚS12.1.29f.; [*udgātr*] Bau-dhŚS2.16:60.13; 2.17:63.4-5; [*brahman*] BhārŚS5.10.5-7; ĀpŚS5.16.6; [*adh-varyu* or *brahman*] KātyŚS4.9.4-7. In his commentary to the Vādhūla ŚS, Āryadāsa refers to the following opinion of Anupadakāra: *anupadakāra āha "yady udgātā na syāt tarhi yajamānaḥ svayam evopotthāya abhihimkṛtya yonibhir upatiṣṭheta"*-iti.

nirṇik pāvakāḥ suyajñó agnir yajáthāya deván.

For the mantra 2: *yās te viśvāḥ* . . . , this is the same with TS3.5.5g(=) (without *svāhā*).

For the mantra 3: *sapta te agne* . . . , this is the same with TS1.5.3h=4.6.5n (=) (without *svāhā*). Cf. also TB3.11.5.

TB1.2.1.9–13 records three Gāyatrīs, three Triṣṭubhs and three Jagatīs. While the New-Taittirīya sūtras use these three sets of metre-mantras for *samidhādhāna* to the Brahmaudanika fire according to the *varṇa* status of the Yajamāna, the schools of Baudhāyana and Vādhūla give the different manners of mantra application.

Baudhāyana uses the same Gāyatrīs for the Brāhmaṇa, but it utilizes different mantras for other *varṇas*, *i.e.* the Triṣṭubhs (TS4.1.2r–w and TB1.2.1.10–11) and the Jagatīs (TS4.4.4g, TS3.3.11f and TS1.5.3h). Vādhūla prescribes the use of Gāyatrī verses (for the Brāhmaṇa) only and is silent on other *varṇas*' cases. Accordingly, these two older Taittirīya sūtras seem not to have used the above Triṣṭubh and Jagatī mantras of TB. In the case of *samidhādhāna* to the Āhavanīya fire, the New Taittirīya sūtras show the influence of the Mānava school and adopt the mantras from the context of the Agnicayana ritual. (Cf. Krick, note 859 to pp.326–7.)

After these Virāj mantras (1.2.2.3–6), the Vādhūla sūtra does not mention *ghora* mantra which is given in TB and is prescribed by other Taittirīya sūtras:

yās te agne ghorās tanúvas tābhir amúṃ gaccha (TB1.1.7.3). Cf. BaudhŚS2.18: 64.9f. etc. Cf. also 1.2.2.10 below.

1.2.2.7–9 The three *tanū* mantras of the Vādhūla sūtra are not found in the Taittirīya śrutis in these forms. The closest parallels are found in the Kaṭhas. Cf. KS7.14:77.13–20: *yā te agne pāvamānā tanūḥ pṛthivīm ānu āvivésa, yāgnāu yā rathantaré yā gāyatre chāndasi yā trivṛti stóme yānne tām ta etád avárun dhe tásyai svāhā, yā te agne pāvakā tanūr antárikṣam ānu vivésa yā vāte yā vāmadevyé yā traiṣṭubhé chāndasi yā pañcadaśé stóme yā paśúṣu tām ta etád avárun dhe tásyai svāhā, yā te agne śúcis tanūr dívam ānu āvivésa yā sūrye yā bṛhatī yā jāgate chāndasi yā saptadaśé stóme yāpsú tām ta etád avárun dhe tásyai svāhā.*

1.3.1.6 (p) Two mantras referred to only by *pratikas*: *dhruvā asadan* and *yan me agna*.

This sūtra presupposes and refers to the following sūtras of the Darśapūrṇamāsa section of VādhŚS, where the mantras are quoted in full form. [sūtra numbers are provisional.] This fact suggests that the Agnyādheya section (I) was placed after the Darśapūrṇamāsa section (II) in the original composition of the Vādhūla sūtra. (Cf. also 1.3.1.14.)

While this mantra is included among the verses accompanying the setting of Nakṣatra bricks in the Agnicayana ritual in the other Yajurveda schools, it is used by the Vādhūla on the occasion when a brick called *Ekāṣṭakā* is placed on the fire-altar. The use of this brick is not found in any other school of the Yajurveda. Cf. VādhŚS8.42: *ekāṣṭakety ekāṣṭakām upadadhāti tapasā tapyamānā=ścībhis, tayā sīdety ...*

1.4.2.39 Mantra unidentified.

1.4.2.40 For Sāmīdhenī verses, cf. 1.3.1.8. The verse to be left out “*pra vo vājā*” is *pratīka* of TB3.5.2.1(1): *prá vo vājā [abhidyavaḥ, haviṣmanto ghṛtācyā, devān jigāti sumnayūḥ.]* (=RS3.27.1)

1.4.2.41 The mantra is the same with RS2.8.1(=).

1.4.2.42 The verse to be left out (: *tan tvā samīdbhir aṅgira*) is *pratīka* of TB3.5.2.1(3): *tám tvā samīdbhir aṅgiro, [ghṛténa vardhayāmasi, bṛhác chocā yaviṣṭhya.]* (=RS6.16.11)

1.4.2.43 Mantra variation(?) of RS1.75.2: *áthā[V: adhā] te aṅgirastamāgne vedhastama prīyám, vocéma bráhma sānasí.*

1.4.3.4 Cf. TB3.5.5.1(1): *samīdho agna ájyasya viyantū.* As for the place of *Vibhakti* (the case-form of the word *agni-*, here the vocative *agne*), Vādhūla sūtra prescribes it to be placed after *ye yajāmahe*; in the same way, the sūtras

7, 10 and 13. Cf. BhārŚS5.19.20–5.20.3 gives three options for the place of *Vibhakti* and the first one agrees with the way of Vādhūla. ĀpŚS5.28.9 also gives three options and the second one agrees with the way of Vādhūla.

1.4.3.5 Cf. TB3.5.2.1(2): *ághna áyāhi vītāye gr̥ṇānó havyádātaye, ní hótā satsi barhīṣi* (=RS6.16.10)

1.4.3.7 The case-form here is “*agnim*”. For the mantra, cf. TB3.5.5.1(2): *tánūnápād agna ájyasya vetu*.

1.4.3.8 Cf. TB3.5.2.3(1): *agnīm dūtām vṛṇīmahe hótāraṃ viśvávedasam, asyá yajñāsya sukrátum*. (=RS1.12.1)

1.4.3.10 The case-form heresis “*agninā*” here. For the mantra, cf. TB3.5.5.1(3): *idó agna ájyasya viyantú*.

1.4.3.11 Cf. TS1.4.46l=3.5.11s: *agnínāgniḥ sám idhyate kavír gr̥hápatis yúvā, havyavád juhvāsyaḥ*. (=RS1.12.6)

1.4.3.13 The case-form here is “*agnis*” here. For the mantra, cf. TB3.5.5.1(4): *barhír agna ájyasya vetu*.

1.4.3.14 Cf. TS4.3.13a: *agnír vṛtrāṇi janghanad draviṇasyúr vipanyáyā, sámiddhaḥ súkrá áhutaḥ*.

1.4.3.15 The mantras implied in this sūtra probably correspond to TB3.5.5.1(5) and (6): (5) *svāhāgním, svāhā sómam, svāhāgním, svāhā prajāpatim, svāhāgníśómau, svāhendrāgnī, svāhendram, svāhā mahendram, svāhā devāñ ājyapān, svāhāgním*. (6) *hotrāj juṣānáḥ, ághna ájyasya viyantú*.

1.4.3.16 *budhanvantāv ājyabhāgau*. Mantra for *anuvākyā* is TS4.1.11t: *agnīm stómena bodhaya samidhānó ámartyam, havyá devéṣu no dadhat*. (=RS 5.14.1) Cf. TB1.3.1.3; BhārŚS5.20.6; ĀpŚS5.28.10. BaudhŚS3.2:70.10 gives, as one of the options, two verses: TS4.1.11t and TS2.3.14e(=RS1.91.8); the latter, however, does not contain the word *budh-* or its derivative. I could not identify the *yājyā* mantra for this *ājyabhāga*.

1.4.3.17 (p) The mantra is *pratīka* of TS4.7.13m: *úd budhyasvāgne [prāti jāgrhy enam iṣṭāpūrté sám̐ sr̥jethām ayám ca.]*

1.4.3.18 *juṣāṇa* mantra, cf. BhārŚS5.20.8: *juṣāṇo agniḥ pavamāna ājyasya haviṣo vetu iti yajati*. Cf. also ŚB(M)2.2.3.22=(K)1.2.3.17: *... juṣāṇó agnír ájyasya vetu iti yajati*.

1.4.3.19 (=) See RS9.66.20=MS1.5.1:66.10-11=TA2.5.2(6):

agnír řṣiḥ pávamānaḥ pāñcajanyaḥ puróhitah, tám̐ imahe mahāgayám.

1.4.3.20 The mantra is the same with RS6.16.16. (=) Cf. ŚB(M)2.2.3.23=(K)1.2.3.19.

1.4.3.21 For *juṣāṇa* mantra, see 1.4.3.18.

1.4.3.23 Pañkti mantras, which refer to the mantras quoted in sūtra 24–29. See TS4.4.4w–z and 1.5.3i–k. Cf. BaudhŚS3.2:70.12f.; BhārŚS5.20.10; ĀpŚS5.28.15.

1.4.3.24 (p) The mantra is *pratīka* of TS4.4.4w: *ágne tám adyá[śvaṃ ná stómaiḥ krátuṃ ná bhadráṃ hṛdispr̥śam, ṛdhyāmā ta óhaiḥ.]*

1.4.3.25 (p) The mantra is *pratīka* of TS4.4.4x: *ádhā hy àgne [krátor bhadrásya dáksasya sādhoḥ, rathír ṛtásya br̥ható babhútha.]*

1.4.3.26 (p) The first mantra is *pratīka* of TS1.5.3i: *púnar ūrjā ní vartasva [púnar agna iśáyusā púnar naḥ pāhi viśvátah.]* The second mantra is *pratīka* of TS1.5.3k: *sahá rayyá ní vartasvá[gne pínvasva dhárayā, viśvápsniyā viśvátas pári.]*

1.4.3.28 (p) The mantra is *pratīka* of TS4.4.4y: *ābhīḥ ṭe adyá gīrbhír [gr̥ṇántó 'gne dáśema, prá te divó ná stanayanti súṣṃāḥ.]*

1.4.3.29 (p) The mantra is *pratīka* of TS4.4.4z: *ebhír no arkáir [bhavā no arvāñ súvar ná jyótiḥ, ágne viśvebhiḥ sumánā ánikaiḥ.]*

1.4.4.2 *Vibhakti* mantras refer to the mantras quoted in sūtras 4 and 7.

1.4.4.4 The mantra is the same with TB3.6.14a (=): *devám barhūḥ, vasuváne vasudhéyasya vetu.(=MS4.10.3:151.2)*

1.4.4.5 The mantra is, with variant readings, close to RS5.13.2=MS4.10.2: 145.12=KS20.14:35.5):

agnéḥ stómaṃ manāmahe sidhrám adyá diviṣpr̥śah(V: diviṣpr̥śam), devásya draviṇasyaváh(V: draviṇasyoh).]

1.4.4.7 For the mantra, see TB3.6.14.2h: *devó nárāśámśah, vasuváne vasudhéyasya vetu. (=MS4.10.3:151.6)*

1.4.4.8 The mantra is, with variant readings, close to RS6.14.1=MS4.10.2: 145.14=KS20.14:35.3:

agná yó mártyo(V: marto) dúvo dhíyaṃ jujósa dhītíbhīḥ, bhásan nú ṣa prá pūrvyá iśam̐ vuritāvase(V: prapūrvīṣam uditāvase?).

1.4.4.11 Cf. TB1.3.1.4; ĀpŚS5.28.13.

TB1.3.1.4: *agnínyaktāḥ patnīsaṃyājānām ṛcaḥ syuḥ. tenágneiyám sárvaṃ bhavati.*

1.4.4.19 (p) For Sarparājñī mantras, see 1.1.4.2. The mantras given here are *pratīkas* of TS1.5.3e–g:

(e) *yát tvā kruddháḥ parovápa [manyúnā yád ávartyā, sukálpam agne tát táva púnas tvód dīpayāmasi.]* (f) *yát te manyúparoptasya [prthivīm ánu dadhvasé, ādityá víśve tát devá vásavaś ca samābharan.]* (g) *máno jyótiṛ juṣatām [ájyaṃ víchinnam̐ yajñám̐ sám imám dadhātu, bṛhaspátis tanutām*

imāṃ no vísve devā ihā mādayantām.]

1.4.4.21 (p) The mantra is *pratīka* of TS1.5.3h:

saptā te agne samīdhah jīhvāḥ [saptā ṛṣayah saptā dhāma priyāṇi, saptā hōtrāḥ saptadhā tvā yajanti saptā yōnir ā prṇasvā ghr̥tēna.]

As for Agnihotra, see 1.2.3. Cf. BaudhŚS3.2:70.1–2: samānaṃ karmā rathacakrāt, etāvad eva nānā: yad amutra tūṣṇīm agnihotraṃ tad iha *sapta te agne samidhah sapta jihvā* iti juhōti.

1.4.4.23 (p) The mantras are three *pratīkas* of TS1.5.3l:
